FIRE FIGHTING MEASURES

Fire/Explosion Hazard: Flammable liquid. Fire fighters to wear self-contained breathing apparatus in the event of a fire. Burning can produce carbon dioxide and/or carbon monoxide. The vapour is heavier than air and may travel along the ground; distant ignition and flash back are possible. Use water fog, or fine spray mist to extinguish.

Additional Information: Hazchem code 3[Y]

ACCIDENTAL RELEASE MEASURES

Spills and Disposal: Spills may be slippery. Remove non-essential personnel from the area and eliminate all sources of ignition. Ensure that any products of incompatible classes near the spill are removed. Dam and recover. Prevent entry into drainage systems, sewers and waterways. Collect with inert absorbent material such as sand or earth. Consult Local Authority on disposal

Personal Protective Equipment: Use sensible work practices that reduce operator exposure to the product. Protective clothing and equipment must be worn: chemically impervious gloves, safety glasses, overalls, waterproof apron and rubber boots. Respiratory protection should be used if there is a risk of exposure to high vapour concentrations. Respirators should comply with AS1716 or an equivalent approved by a state/territory authority.

Engineering Controls: Ensure that adequate ventilation is provided.
